

Lasting economic benefit

FTL’s data centre campus is planned for New Brunswick and will serve companies across the nation and the world. It is an export business: new money flows into the region, building the economy of Miramichi and beyond.

\$2.7B

local investment at full campus
about \$700M in the first phase

Tax revenue each year

FTL estimates at full buildout, based on expected customers. All figures are approximate.

City of Miramichi	Property tax \$50M	\$50M
New Brunswick	Property tax \$30M + corporate tax \$26M Income tax \$3M + GST/HST \$45M	\$104M
Canada	Corporate tax \$28M + income tax \$5M GST/HST \$23M	\$56M
In total	Property tax \$80M + corporate tax \$54M + income tax \$8M + GST/HST \$68M	\$210M

Corporate tax: \$54M, split about 52% federal (15% rate) and 48% provincial (14%). Income tax: 500+ permanent jobs at average salaries of \$75,000 or more, about 58% federal and 42% provincial. GST/HST: estimated on projected sales at full buildout.

\$250M+

Revenue for NB Power

A year at full buildout, strengthening the utility’s finances with no public investment.

500+

Permanent jobs

Average salaries of \$75,000 or more, plus indirect jobs across local suppliers and services.

2,000

Construction jobs

Work for local construction companies and tradespeople while the campus is built in phases.

Across the province

Many data centres are owned and run from other provinces and countries, so most of the benefit leaves with them. FTL will build and operate its campus in New Brunswick, so the jobs, income and tax revenues remain with the people and municipalities that host it. Investment will also help regenerate mid and northern New Brunswick communities, giving every region a stronger economy.
